CERTIFICATIONS

[Salesforce certified Platform Developer I](#) | [Salesforce Certified Administrator](#)

PROFESSIONAL EXPERIENCE:

Salesforce Developer at Cognizant Technology Services, Hyderabad, India.

August 2021 - June 2023

- Implemented multiple integration **APIs** to retrieve data from external sources, provided **live service support**, particularly in the insurance industry project (DLG-Direct line group), And used Tools like **Jira**, **GitHub**, and **Visual Studio code**.
- Responsible for implementing component-based security by configuring **user permissions**, **record type permissions**, and **field-level security** within the Salesforce org, **Debugging** and **troubleshooting** issues raised by users, and ensuring the smooth functioning of the Salesforce applications.
- Involved in customizing various aspects of the Salesforce platform, including **custom objects**, **fields**, **record types**, **forms**, **layouts**, **custom tabs**, and **applications**, as well as maintaining **workflow rules**, **approvals**, and **relationships** between **objects**.
- Worked on **Data Loader** To perform **CURD** Operation and Implemented various advanced fields like **Picklist Fields**, **Master-Detail Fields**, **Custom Formula Fields**, and defined **Field Dependencies** for custom Picklist fields.
- Understanding and analyzing business requirements, mapping them to Salesforce functionality, and implementing applications using **Agile Scrum** Methodology with change-sets for **sandbox-to-sandbox** deployments; collaborating with stakeholders to translate requirements into technical specifications for **role-based access controls**, **permission sets**, **queues**, and **data security measures**; modifying configurations like **page layouts** and **triggers** to streamline case management processes, deploying changes via **user stories** across sprints after thorough testing and UAT.
- Developed custom **Apex classes**, **triggers**, and **flows** to extend the functionality of Salesforce which included the enhancement of registration request functionality for a customer portal, effectively addressing data inconsistencies and slashing ticket counts from 50-60 per month to a mere 5-6 over a month-long period.
- Developed a user-friendly digital UI web-based signup form for onboarding new regions, seamlessly **integrating LWC Framework** with **Apex** and **triggers**. Ensured robust communication between systems through **REST and SOAP APIs**, deploying the new functionality within the existing platform framework.

SFDC developer & Admin at LTIMindtree Ltd, Hyderabad, India.

Sep 2018 - Oct 2021

- Developed **Apex classes**, **triggers**, **Visualforce pages**, **components**, and controller extensions to create custom functionality and user interfaces within the Salesforce platform, including public-facing websites using **Force.com** Sites.
- Set up Marketing Campaigns, Campaign Hierarchies, Lead Queries, Assignment rules, **Web-to-Lead** and **Auto-Response rules**, Configured Campaign Management, **Campaign Influence**, and **Lead Conversion**.
- Maintaining **Workflow rules** and **Approvals**, creating relationships between the **objects**.
- Managed user **accounts**, **roles**, **profiles**, and **sharing rules** to define **access levels**, and **permissions**, implemented data management processes, including data migration using the **Data Loader tool**, and configured security settings like **tab permissions**, **record type permissions**, **field-level security**, and **sharing rules** to control access and data visibility.
- Involved In customization, Creating **custom labels** and **Custom settings**, **custom buttons**, and **Customizing fields**, **record types**, **forms** and **layouts**, **custom tabs**, and **applications**.
- Used Visualforce Templates and Placeholders to encapsulate **page elements** to be reused across several Visualforce pages, **Tab permissions**, **Record Type permissions**, and **Field Level Security** to implement **Component-based security**.
- Implemented Data migration using **Data Loader**, Creating/adding, and managing **Users**, **Roles**, and **Profiles**, and setting up **sharing rules**.
- Involved in **Salesforce.com** Application Setup activities and customized the apps to match the functional needs of the organization Worked with standard Salesforce objects like **Accounts**, **Contacts**, **Leads**, **Cases**, and **Opportunities**
- Created Custom **Visualforce components** and **attributes** to override the look and feel of standard Visualforce components.

EDUCATION:

Auburn University at Montgomery, MS, Computer Engineering, Montgomery, AL, United States.

January 2023 - December 2024

Coursework – Could computing and Advanced Data Structures, Algorithms, Object Oriented Design, Introduction to Database Management Systems.

Jawaharlal Nehru Technological University, B-Tech, Hyderabad, India.

August 2018 - June 2021

Coursework - Computer Science and Architecture, Cyber Security, Advance Networking Technologies, object-oriented programming design.
